

Literature Report 5

Rhodium-Catalyzed Intramolecular Nitrogen Atom Insertion into Arene Rings

Reporter: Qing-Xian Xie
Checker: Jian Chen

2023-8-21

Li, H.; Wei, H.* *J. Am. Chem. Soc.* **2023**, 145, 17570-17576

CV of Prof. Hao Wei

Research:

- Skeletal editing
 - Energetic materials
 - The active composition of marine organisms
-

Background:

- **2007-2011** Ph.D., Lanzhou University (Prof. Peng-Fei Xu)
- **2011-2013** Postdoc., Peking University (Prof. Zhen Yang)
- **2013-2015** Postdoc., University of Idaho (Prof. J. M. Shreeve)
- **2015-Now** Professor, Northwest University

Contents

1

Introduction: Single-Atom Skeletal Edit

2

Nitrogen Atom Insertion into Carbocyclic Frameworks

3

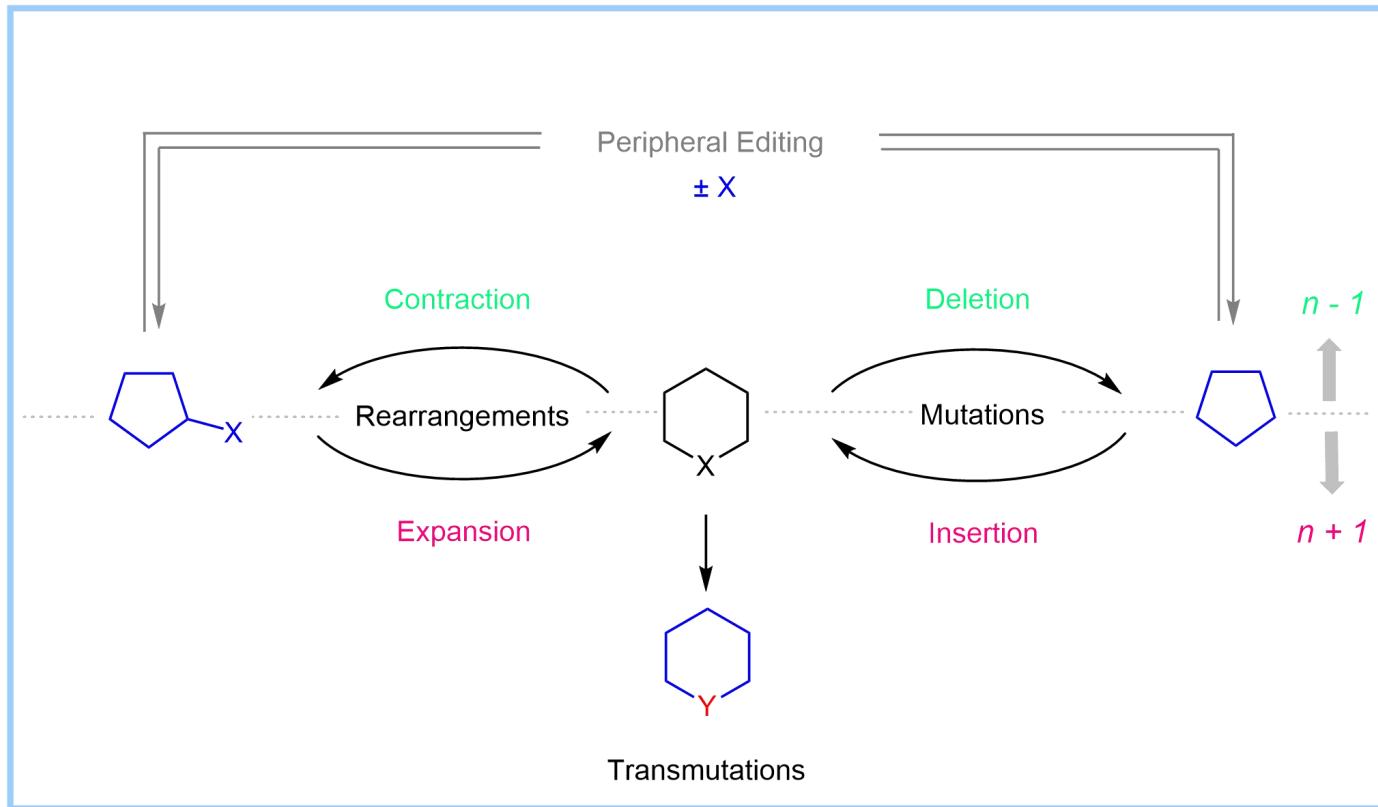

Rhodium-Catalyzed Nitrogen Atom Insertion

4

Summary

Introduction

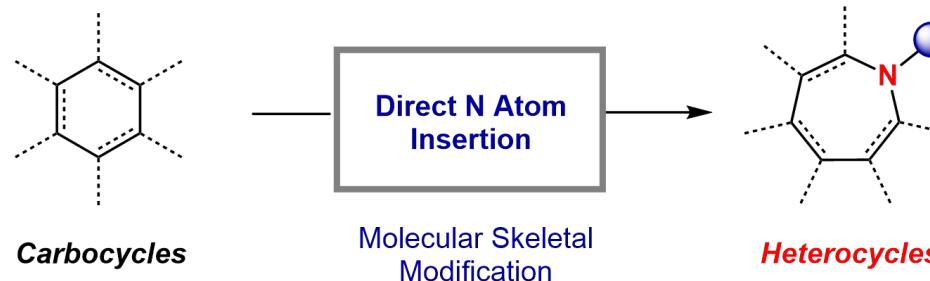

Single-Atom Skeletal Edit

Jurczyk, J.; Sarpong, R.* *Nat. Syn.* **2022**, 1, 352-364

Introduction

Nitrogen Atom Insertion into Carbocyclic Frameworks

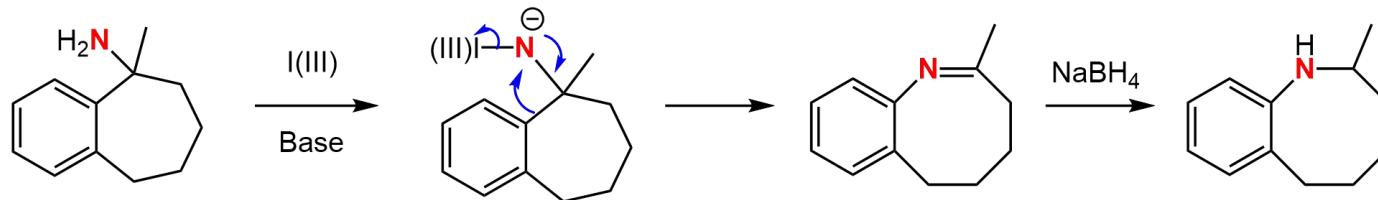

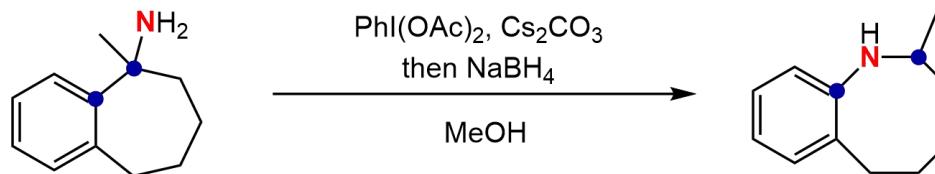

Well-Known Examples:

Nitrogen Atom Insertion into Cycloalkanes

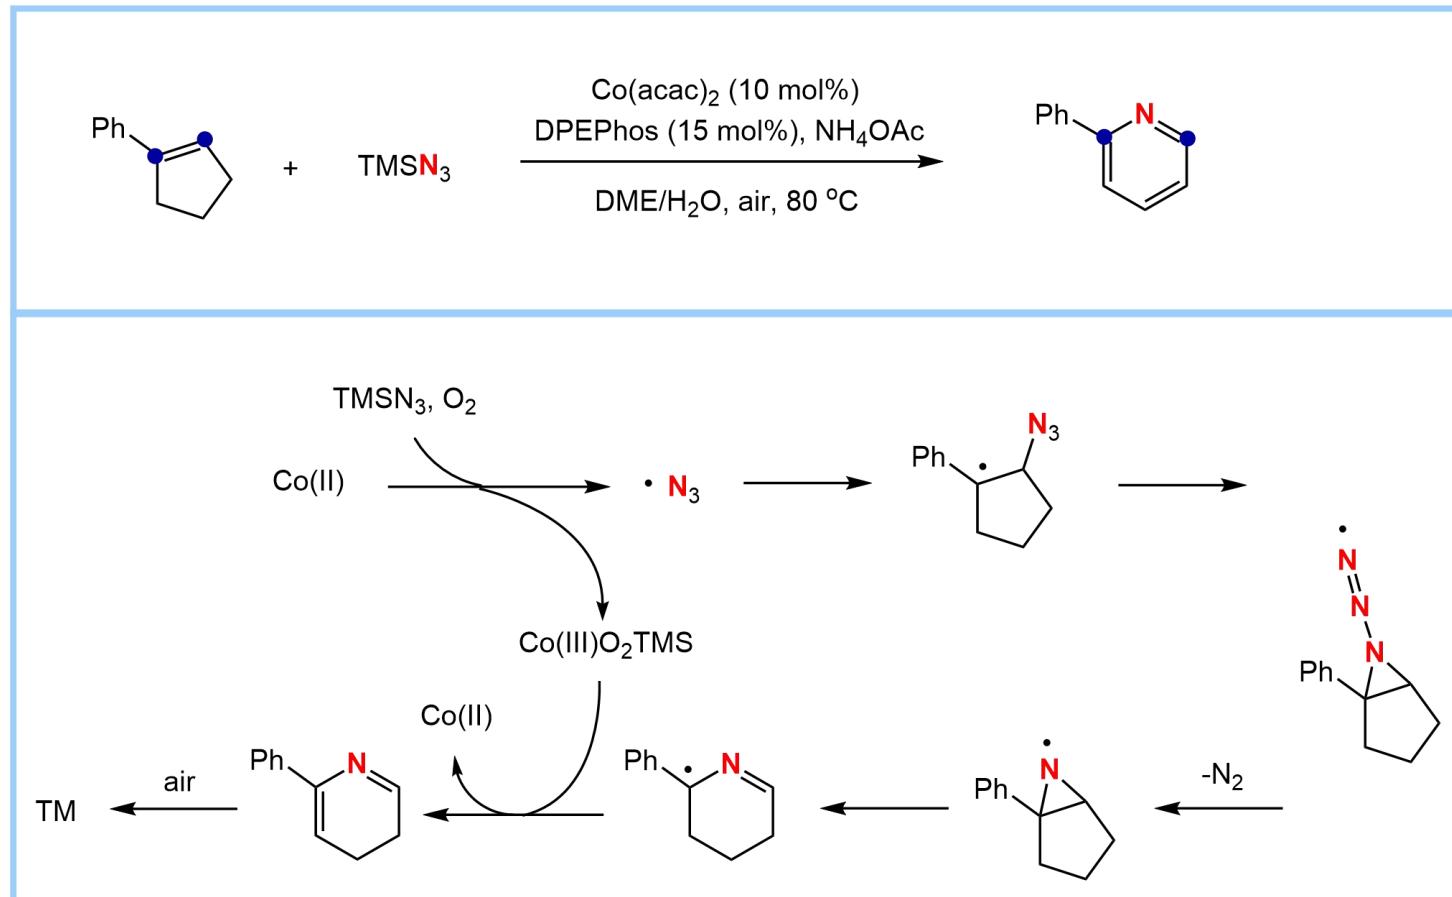

Oxidative Rearrangement of Primary Amines

Yamakoshi, W.; Murai, K.* *Org. Lett.* **2019**, 21, 3023-3027

Nitrogen Atom Insertion into Cycloalkenes

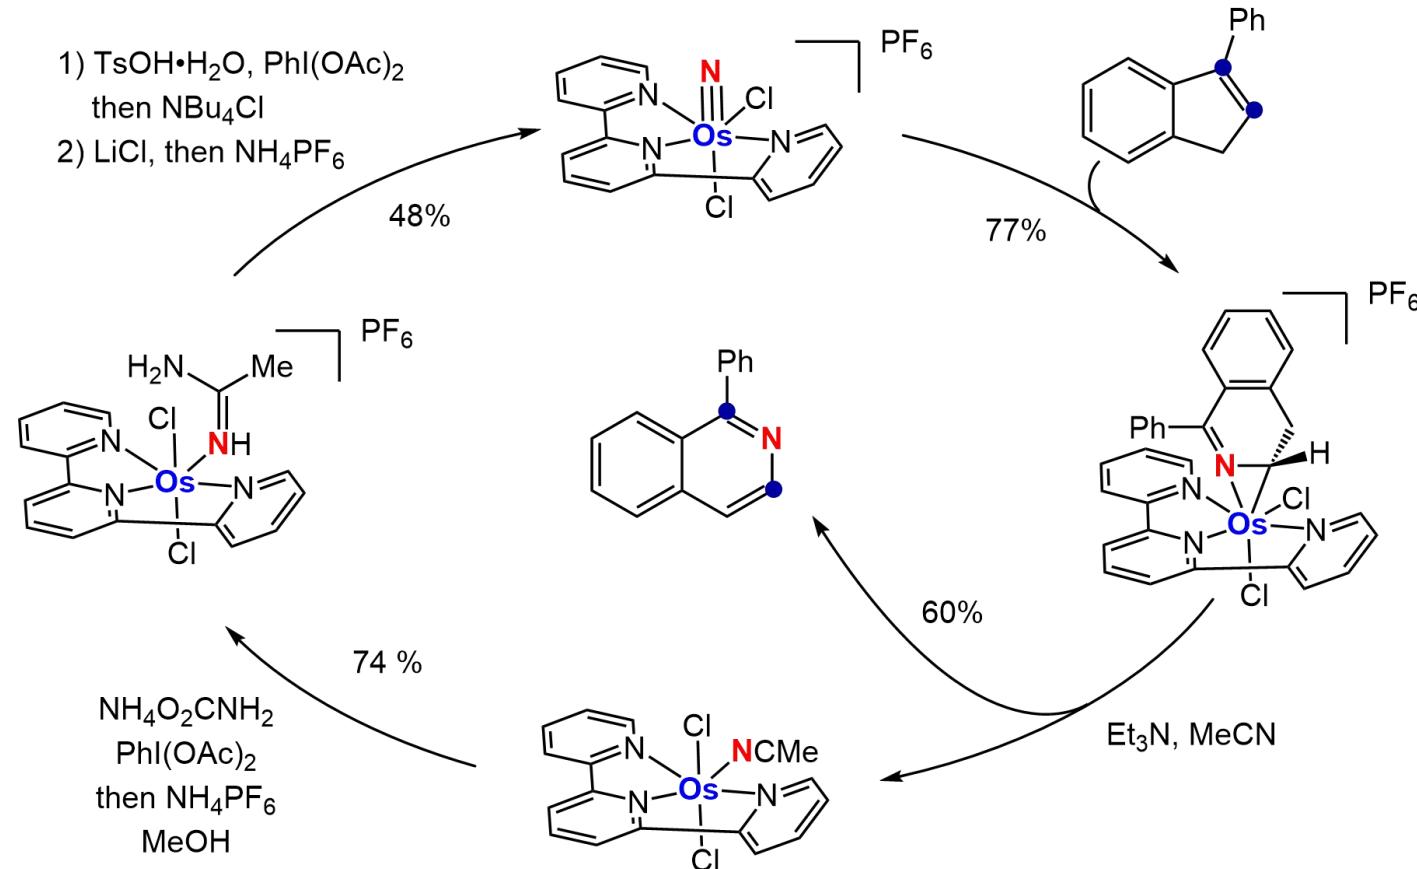

Cobalt-Catalyzed Nitrogen Atom Insertion into Arylcycloalkenes

Wang, J.; Wei, H.* *J. Am. Chem. Soc.* **2022**, 144, 22433-22439

Nitrogen Atom Insertion into Cycloalkenes

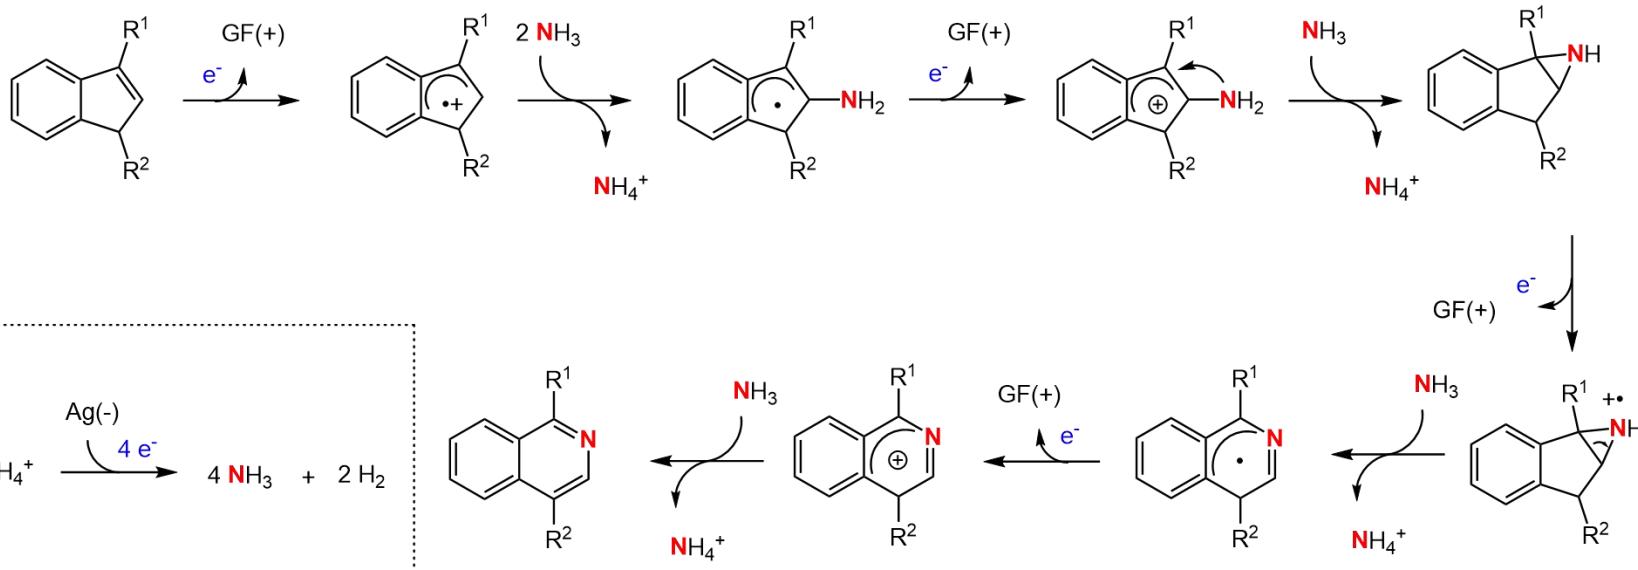

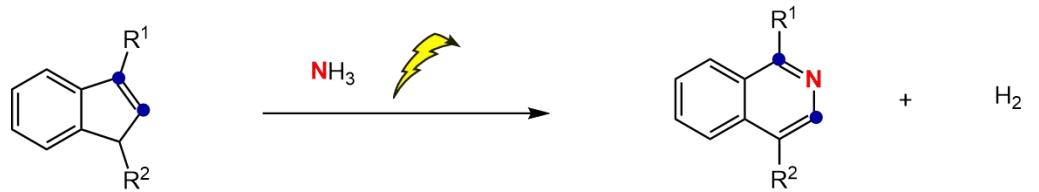

Osmium(VI) Nitrides-Promoted Nitrogen Atom Insertion into Phenylindene

Kelly, P. Q.; Levin, M. D.* *Angew. Chem. Int. Ed.* **2022**, 61, e202213041

Nitrogen Atom Insertion into Cycloalkenes

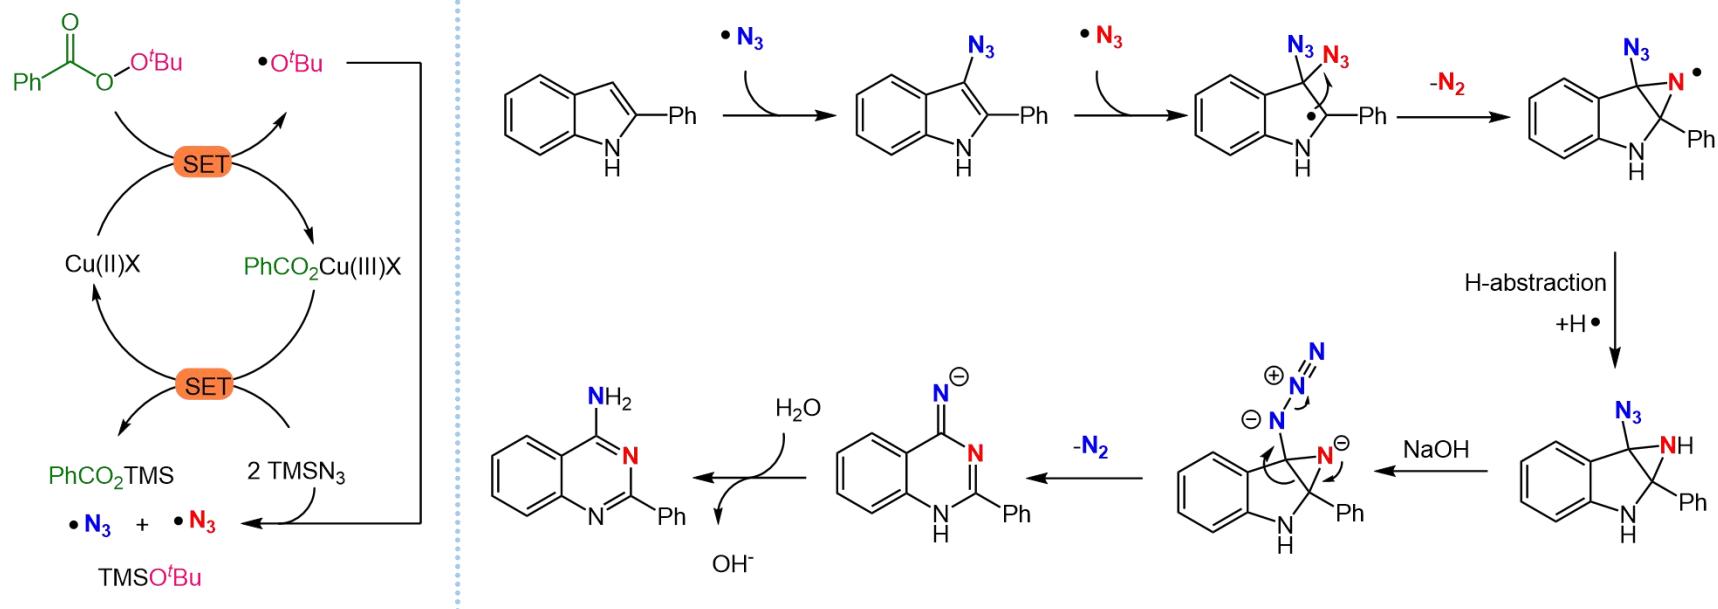

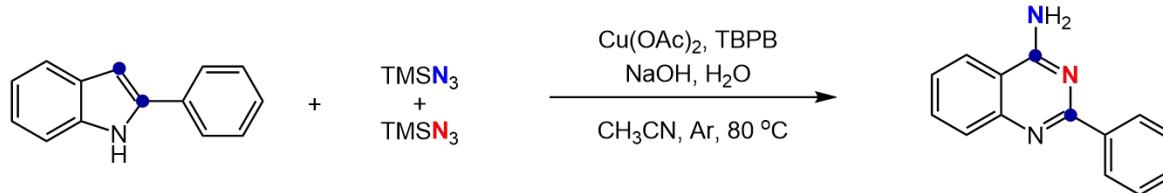

Insertion of Ammonia into Phenylindene via Electrochemical Method

Liu, S.; Cheng, X.* *Nat. Commun.* **2022**, *13*, 425

Nitrogen Atom Insertion into Aromatic Compounds

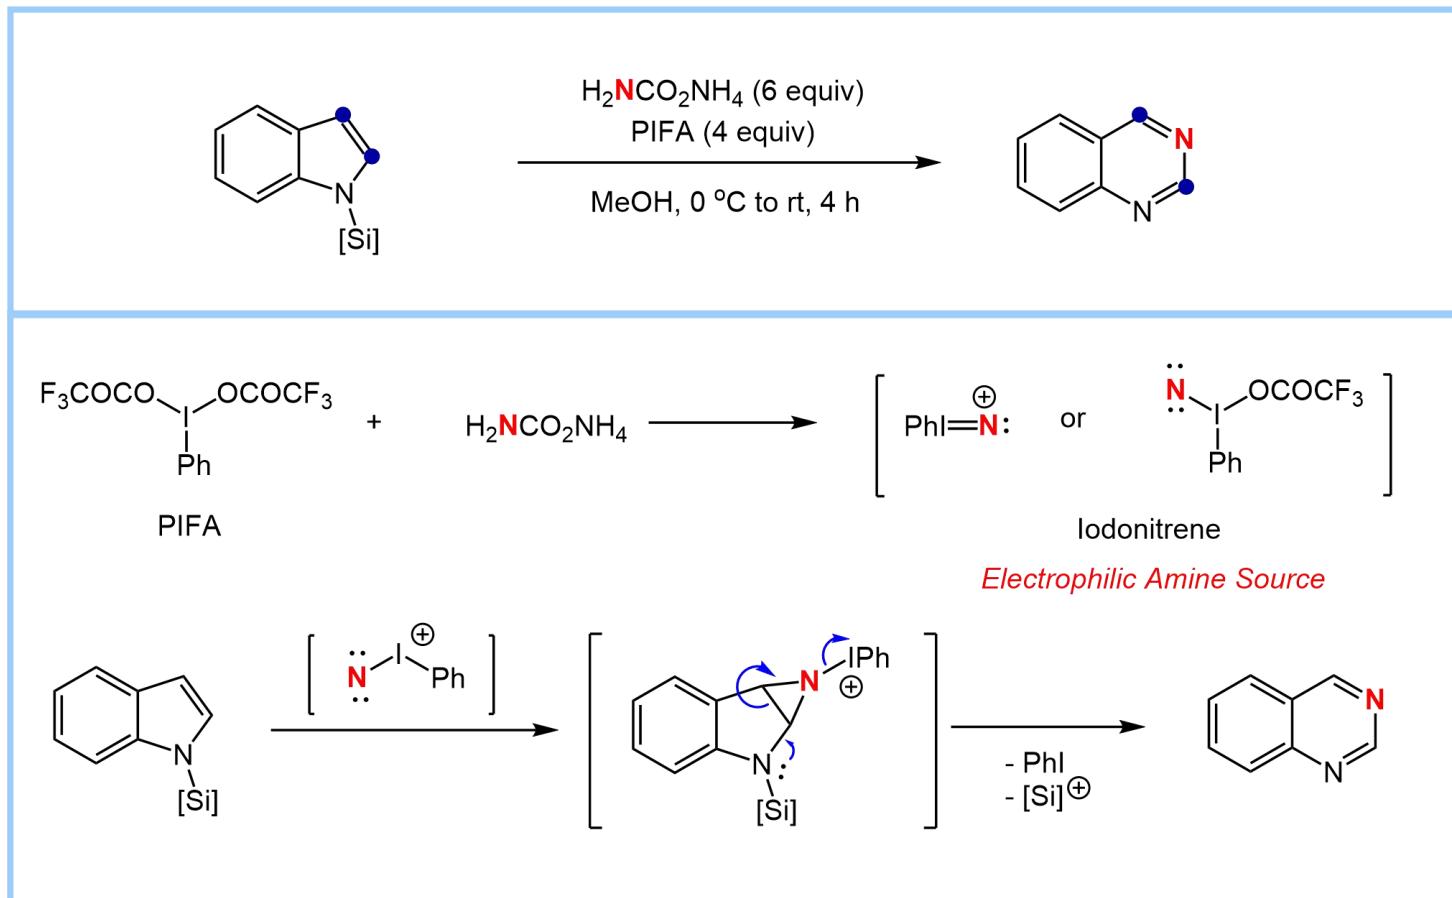

Copper-Catalyzed Nitrogen Atom Insertion into 2-Arylindoles

Xu, M.-M.; Ji, S.-J.* *Chem. Commun.* **2018**, 54, 12602-12605

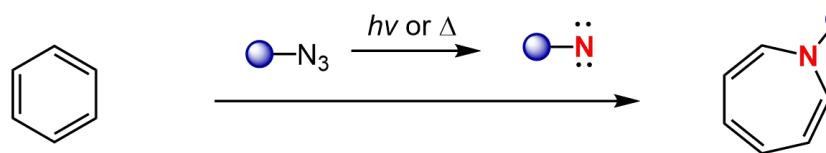

Nitrogen Atom Insertion into Aromatic Compounds

Insertion of Nitrogen Atom into Indole via Electrophilic Nitrene

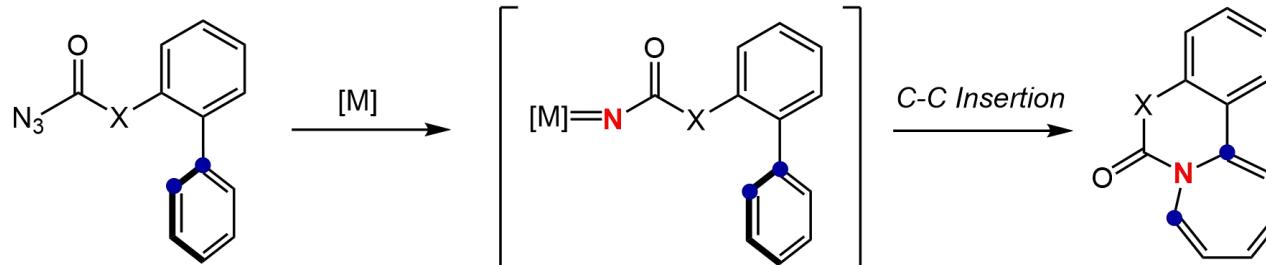

Reisenbauer, J. C.; Morandi, B.* *Science* **2022**, 377, 1104-1109

Project Synopsis

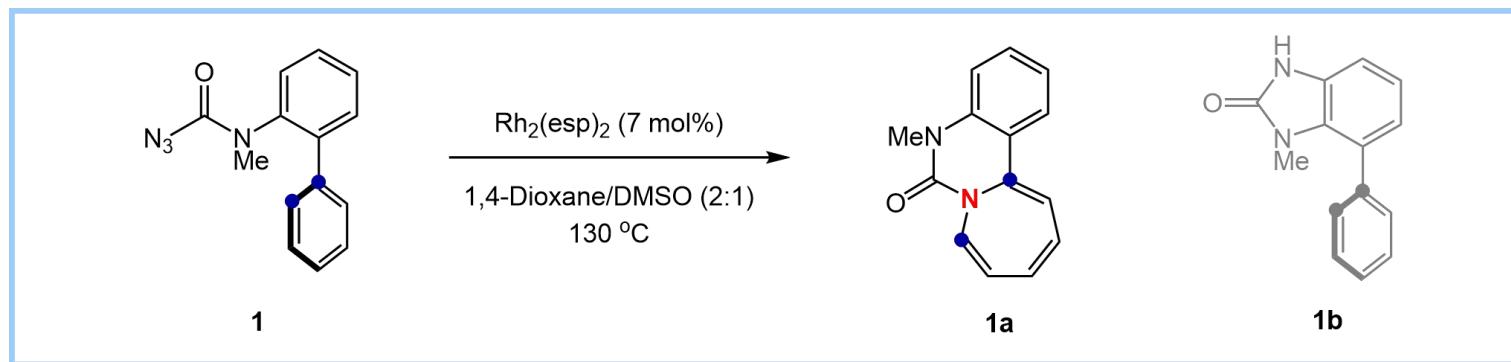

- ♥ direct skeletal modification
- ♣ low yielding
- ♣ benzene solvent
- ♣ lacking regioselectivities
- ♣ limited investigation of group
- ♣ many side products

Cotter, R. J.; Beach, W. F. *J. Org. Chem.* **1964**, 29, 751-754

Li, H.; Wei, H.* *J. Am. Chem. Soc.* **2023**, 145, 17570-17576

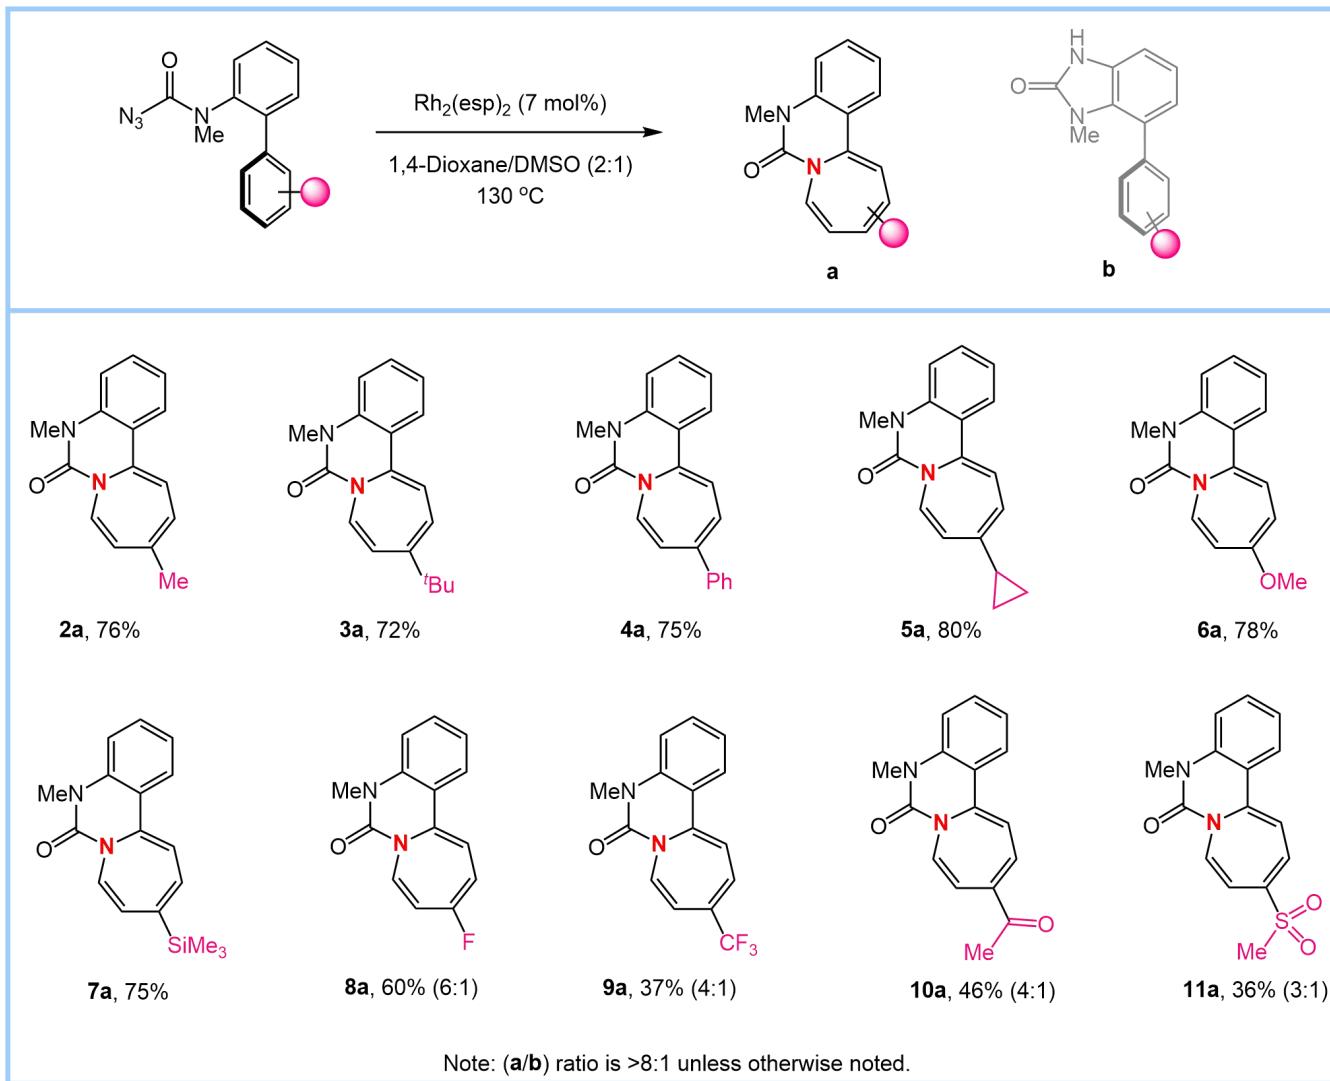

Optimization of Reaction Conditions

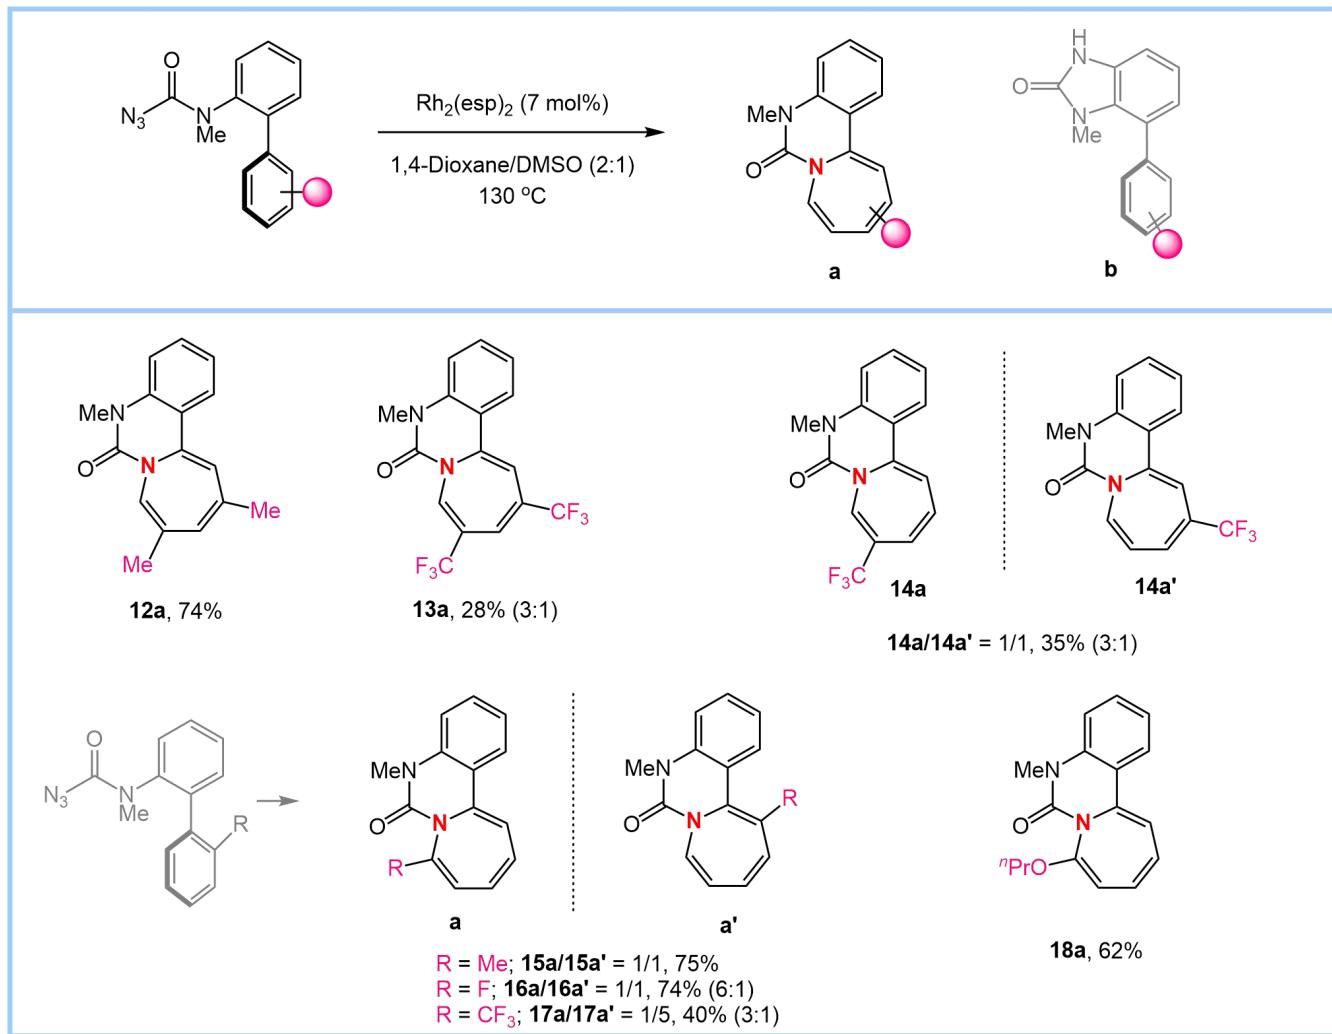

Entry ^a	Variation	Yield ^b (%)	
		1a	1b
1	None	80	9
2 ^c	w/o $\text{Rh}_2(\text{esp})_2$	39	37
3	$\text{Rh}_2(\text{OAc})_4$ instead of $\text{Rh}_2(\text{esp})_2$	62	7
4	$\text{Rh}(\text{PPh}_3)\text{Cl}$ instead of $\text{Rh}_2(\text{esp})_2$	50	11
5	$[\text{Cp}^*\text{Rh}(\text{CH}_3\text{CN})](\text{SbF}_6)_2$ instead of $\text{Rh}_2(\text{esp})_2$	17	56
6	CoTPP instead of $\text{Rh}_2(\text{esp})_2$	46	15
7	Fe(TPP)Cl instead of $\text{Rh}_2(\text{esp})_2$	35	37

[a] All reactions were carried out using **1** (0.1 mmol) with 7 mol% $\text{Rh}_2(\text{esp})_2$ in Dioxane/DMSO (2/1) at 130°C for 24 h. [b] Isolated yields. [c] The reaction time was 48 h.

Proposed Mechanism

Summary

Rhodium-Catalyzed Intramolecular Nitrogen Atom Insertion into Arene Rings

The First Paragraph

写作思路

芳烃作为有机分子普遍存在结构具有重要意义

芳烃的C-H键官能团化得到快速发展

芳烃的C-C键活化仍存在挑战

The Last Paragraph

写作思路

总结工作：铑催化氮原子插入芳环C-C键新策略

提出展望：铑催化剂改变反应选择性值得进一步研究

Representative Examples

- Recently, considerable effort has been dedicated to the development of versatile C-H functionalization strategies to modify target arenes.
(投入很大努力)
- Given the widespread abundance of arene rings⋯⋯ (鉴于⋯⋯的普遍性)
- To elucidate the reaction mechanism and the origin of the chemoselectivity, DFT calculations were performed. (elucidate: 解释, 阐释, 可代替explain、expound、interpret)
